## **DETAILED ACTION**

### **Continued Examination Under 37 CFR 1.114**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/19/10 has been entered.

### **Response to Amendment**

Applicant's amendment filed on 10/19/10 has been entered. Claim 18 has been cancelled. Therefore, claims 1, 2, 4-7, 11-13 and 17 remain pending in the current application.

### **Allowable Subject Matter**

Claims 1, 2, 4-7, 11-13 and 17 allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 11 (Amended): The closest prior art Lee (US 6295105) discloses in Figure 9 a liquid crystal display device, comprising:

- a liquid crystal display panel (112);
- a light guide plate (element 120) having a projection plane in parallel with a rear plane and a light incident plane (as shown);
- a reflection plate (element 122) along the rear plane of the light guide plate;

a fluorescent lamp (element 118) along the light incident plane of the light guide plate;  
a reflection sheet (element 124) having opposed first and second end portions and substantially enclosing an outer side of the fluorescent lamp except for a light exit portion (as shown),

wherein the reflection sheet is formed of a synthetic resin (Column 4, lines 48-51), and  
wherein the second end portion of the reflection sheet overlaps the reflection plate (element 122) and the rear plane of the light guide plate (as shown);

optical sheets (element 116) over the projection plate of the light guide plate and overlapping the first end portion of the reflection sheet by an overlap amount (B);

a bottom cover (element 138) extending from a rear side of the reflection plate to an outer side of the reflection sheet such that an end portion of the bottom cover extends to the outer side of the reflection sheet substantially following a contour of the reflection sheet to substantially surround the reflection sheet except for a predetermined interval (A) from the light guide plate and the overlap amount (B)

wherein the end portion of the bottom cover is positioned to leave the same predetermined interval (A) from the optical sheets (the interval A being the length of portion of the reflection sheet not overlapped by either the optical sheet or the bottom cover), and

a chassis (element 130) supporting and affixing the liquid crystal display panel and the bottom cover.

Further, Sakamoto teaches in Figure 4 and 6 of forming a liquid crystal display fixing element (element 9) integral with an end portion of a bottom cover (element 6), thus the end portion of the bottom cover contacts all the outer side of the reflection sheet.

However, Lee and Sakamoto either alone or in combination do not further reasonably teach or suggest that the first end portion of the reflection sheet overlaps the light guide plate by the same overlap amount (B), since Lee discloses in Figure 9 that the overlap amount between the reflection sheet and the light guide plate is greater than the overlap amount between the reflection sheet and the optical sheets.

Therefore, claims 1 and 11 are deemed non-obvious and inventive over the prior arts and are allowed.

As to claims 2, 4-7, 12, 13 and 17: Since claims 2, 4-7, 12, 13 and 17 depend either directly or indirectly on the allowed claims 1 and 11, thus are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
